VISION

To be the world's best Supply Chain Solutions technology company.

MISSION

Deliver unparalleled Global Supply Chain Logistics Execution Networks efficiencies for a better carbon neutral commerce.

INNOVATION

- ✓ Our commitment to innovation keeps us at the forefront of the industry.
- ✓ We go above and beyond to provide unparalleled value through deep industry knowledge and creative problem-solving.
- ✓ We utilize the latest technological advancements, including Cloud Computing, Gen.AI, ML, and IoT.
- ✓ Our solutions offer industry-first superior supply chain management.

TRUST

- ✓ Clients across 12+ different industries have trusted us for over a decade.
- ✓ We are dedicated and passionate about delivering simple solutions to complex workflows.
- ✓ We ensure single-window ownership on deliverables.
- ✓ We guarantee robust data security.

MATRIX WE IMPACT

“

**TRANSFORM YOUR SUPPLY CHAIN LOGISTICS
EXECUTION NETWORKS.
UNLOCK HIDDEN EFFICIENCIES AND ELEVATE
OPERATIONAL EXCELLENCE.**

AREAS WE TRANSFORM

NETWORKS

Digitally onboard your supplier network with the end-to-end process and audit-proof & intuitive industry-specific workflows

PROCUREMENT

Enable your all modes of transportation and logistics services procurement through reverse or forward auction with dynamic smart contracts

OPTIMIZATION

Manage your dispatches across SCLen with cutting-edge mathematical solvers with optimum cost and time to serve across SCLen network

EXECUTION

Manage your Primary, Secondary, and Last mile distribution across all modes of transportation through an integrated & collaborative agile execution Platform

VISIBILITY

Enable your surface, Ocean, Air & multimodal transportation real-time visibility through a single window exception handling platform

RECONCILIATION

Automate your delivery confirmation with a fail-proof process and audit controls along with a smart delivery reconciliation process platform

ANALYTICS

Optimize supply chain logistics networks with advanced data analytics, AI/ML, & Generative-AI for efficiency, cost reduction, dynamic insights for better decision making

ORCHESTRATION

Tune your SCLen KPIs to business goals and Orchestrate your SCLen workflows to meet your business topline and bottom-line objectives

INDUSTRY FIRST AI & ML ENABLED PLATFORM

INDUSTRY-SPECIFIC SOLUTIONS:

AI driven industry specific agile configuration managers to seamlessly create workflows across 12+ industry segments.

END-TO-END OPTIMIZATION:

Leverages AI to optimize workflows across all logistics modes, from procurement of Logistics services to Vendor payment.

STAKEHOLDER CONNECTIVITY:

Uses ML algorithms to facilitate seamless communication and data exchange between all stakeholders in the SCLEN value chain.

LARGE-SCALE INTEGRATION:

Connects over 4500+ ecosystem clients over 100 integration touch points using AI to manage and optimize this extensive network.

PERFORMANCE METRICS ENHANCEMENT:

Applies advanced analytics and ML to drive significant improvements in SCLEN productivity and business performance metrics.

CONTINUOUS IMPROVEMENT:

Utilizes ML to continuously optimize "time to market" and "cost to serve" metrics.

With an integrated AI & ML Capabilities, SCLEN.AI is an Transformative Force in Supply Chain Logistics to enhance Business Performances.

INDUSTRY FIRST AI & ML ENABLED SINGLE WINDOW END TO END WORK FLOW FEATURES

PREDICTIVE ANALYTICS

- ✓ Utilizes historical data and real-time inputs to forecast the Freight, Expected Delivery Date and potential Disruptions.
- ✓ Employs advanced ML algorithms to continuously improve prediction accuracy.

COMPUTER VISION

- ✓ Implements computer vision technology for validating important documents like RC, DL, PUC, Insurance, LR & POD.

LOAD BUILDERS & ROUTE OPTIMIZATION

- ✓ Implements AI-driven algorithms to determine the most efficient transportation routes.
- ✓ Considers multiple factors such as traffic patterns, weather conditions, and fuel efficiency.

GENERATIVE AI FOR SCENARIO PLANNING

- ✓ Utilizes generative AI to create and analyze multiple "what-if" scenarios.
- ✓ Helps businesses prepare for various potential supply chain disruptions and opportunities.

AUTO SCHEDULING & ALLOCATORS

- ✓ Auto allocation of resources, vehicles, Service providers based on the business constraints to achieve cost to serve and time to market objectives.

MACHINE LEARNING FOR SUPPLIER MANAGEMENT

- ✓ Applies ML algorithms to evaluate supplier performance and risk.
- ✓ Assists in identifying the most reliable and cost-effective suppliers.

AUTONOMOUS DECISION MAKING

- ✓ Develops AI systems capable of making real-time decisions in response to supply chain events.
- ✓ Reduces human intervention in routine decision-making processes, improving efficiency and reducing errors.

AI-POWERED DEMAND FORECASTING

- ✓ Implements advanced AI models to predict future demand with high accuracy.
- ✓ Considers multiple factors including market trends, economic indicators, and seasonal variations.

NATURAL LANGUAGE PROCESSING (NLP)

- ✓ Incorporates NLP to analyze unstructured data from various sources.
- ✓ Extracts valuable insights to inform supply chain strategies and improve customer service.

CARBON FOOTPRINT OPTIMIZATION

- ✓ Intelligent mode shift allocation.
- ✓ Intelligent carbon efficient vehicle selection to achieve carbon credit goals.

Powered by advanced MILP, Constraint programming, Analytics mathematical models, AI & ML algorithms.

OUR APPROACH

WE UNDERSTAND

One Size doesn't fit all...

WE REALIZE

Based on the business models & legacy process each industry segment orchestrate SCLN through unique workflows

WE DELIVER

Industry specific, customer relevant holistically stitched SCLN workflows to over 12 different Industry segment

WHAT DIFFERENTIATES US

FLEXIBLE & AGILE

Offers highly configurable in real-time to match your business needs

EASE OF INTEGRATION

Offers Seamless fail-proof API integrations across all the multi-layered execution touchpoints

SCALABILITY

Scale your business on demand in no time without worrying about fixed costs, and pay as per your use

ONE PLATFORM

We take ownership of transforming your SCLN operations through one platform, and No excuses!

CREATING SIGNIFICANT SOCIAL IMPACT

CO2 REDUCTION

Our holistic collaborative workflows enhance SCLEN's efficiency, optimizing fleet utilization across all transportation modes and minimizing empty runs.

SKILL UP-LIFTMENT

Digitizing the entire process enhances the skills of last-mile workforce, including drivers, helpers, pickers, and security personnel.

GREEN INITIATIVE

On every Implementation, we save many trees through SCLN digitization. We aim to continuously innovate & pursue every customer to go 100% paperless.

ORCHESTRATE SCLEN THROUGH AI ENABLED SINGLE WINDOW PLATFORM

MORE ABOUT US...

Founded in 2012, Caliper Business Solutions is a pioneer in innovating and orchestrating workflows within Supply Chain Logistics Execution Networks (SCLEN). The company leverages the latest advancements in generative artificial intelligence (AI) and machine learning (ML) to drive next-generation efficiencies. Caliper focuses on delivering industry-specific, tailor-made solutions, including digitization, analytics, and optimization. These capabilities are orchestrated through their advanced SCLEN Mission Control Tower, providing comprehensive oversight and control.

At Caliper, we prioritize global centralized planning, agile execution, and advanced decision support to drive unparalleled SCLEN productivity and efficiencies. We set new industry standards while focusing on paperless and go-green initiatives.

Caliper offers SCLEN.AI, a cloud-based SaaS platform powered by generative AI and machine learning. This platform optimizes end-to-end Supply Chain Logistics Execution Networks (SCLEN) workflows across all logistics modes. SCLEN.AI acts as a digital bridge, seamlessly connecting all stakeholders in the SCLEN value chain. It offers unparalleled agile workflow management, from SCLEN services procurement to final customer delivery and vendor bill settlement. By continuously optimizing "time to market" and "cost to serve," the platform ensures efficient and effective logistics operations.

SCLEN.AI is a transformative platform, catering to clients over 12 different industry segments by digitally connecting more than 10,000 service partners network. This extensive network drives significant enhancements in SCLEN productivity & Business performance metrics, making SCLEN.AI an indispensable tool for businesses aiming to accelerate their supply chain logistics efficiency and continuously improve business top line and bottom line performance.
